VitalCare

Auto Safety Lancets

Let's get to the point

High quality lancets at great prices.

Better value for your money

The *AUTO* is a small, disposable safety device which administers a prick to the finger, to obtain a drop of blood.

The *AUTO* is by far the most cost-efficient safety lancet available on the NHS contract. You could make very substantial savings simply by switching to VitalCare.

The *AUTO* is a worldwide success due to its simple yet effective patented trigger technology which delivers a safe, virtually pain-free finger prick – every time.

The highly polished, finely ground needle performs the prick in a split second, before retracting back into the device – for good. The *AUTO* is entirely self-disabling, so there is no risk of needle-stick injury or cross-infection.

We can cater for all types of skin and patient groups – the only exception being neonates.

| Model | N P C | Needle size |
|--------------|--------|-------------|
| Junior pink | FTM065 | 26g x 1.8mm |
| Soft blue | FTM066 | 21g x 1.8mm |
| Normal beige | FTM067 | 21g x 2.4mm |
| Extra green | FTM069 | 21g x 3.0mm |

Why pay an extra 36% for the same job
